I hope we are not strangers. I have some.

In one of the paragraphs of the famous poem, "Lady of Shalott," there is a line that says: "There is no rain without a rainbow." This suggests that even in the midst of life's storms, there is always something beautiful waiting to be discovered. The rainbow represents hope and renewal, and it serves as a reminder that through each downfall there is an opportunity for growth and transformation. This message holds true in many aspects of life, reminding us to stay open to new experiences and to find beauty even in the most unexpected places.
